

KenkoDream[®] Quilt

Key Features and Benefits

- Specifically designed for a relaxing, healthier, and ultimately refreshing sleep
- Cocooning Magnetic Technology
- Exceptional Far-Infrared temperature regulation
- Releases the negative ions found in soothing, natural environments
- Outer and inner covers of breathable, natural fibres

When you sleep really deeply, your brain starts to recharge. Your learning and memory are enhanced. And when you spend enough time in the deepest stages of sleep, your muscular coordination and immune systems also benefit.

There are a number of reasons why you experience a better, more beneficial sleep when you slip under a KenkoDream Quilt every night.

Naturally, it has a breathable cotton cover, but ceramic reflective fibres also absorb excess heat, reflecting it back as a

gentle warmth whenever it's required. You'll neither be too warm nor too cold, as your body's temperature will be perfectly balanced. Ionic Comfort Technology releases negative ions to create a naturally soothing environment, while a magnetic layer enhances the Earth's natural energy field, helping you to overcome stress, discomfort and low energy levels.

Once you introduce the KenkoDream Quilt into your life you'll not only notice how quickly you fall asleep, but also how you wake up feeling refreshed, reinvigorated, and looking forward to a new day!
